**Notes to Editors:**

Since listing in 2006, Stratex has discovered more than 2.2 million ounces of gold and 7.09 million ounces of silver, as well as 186,000 tonnes of copper. The

Company achieved first gold pour at its 45%-owned Altıntepe gold mine in Turkey in November 2015 and recently sold its 1% Net Smelter Returns royalty in the Öksüt gold project for US\$4.5 million. It also owns 14.87% of a copper-gold project at feasibility stage. With its current cash position, projected cash returns and no debt, the Company is well-placed to advance its existing exploration programmes and is also actively seeking to acquire advanced projects that are at the drill-ready stage or even have identified resources.
